## DETAILED ACTION

### *Information Disclosure Statement*

A corrected (previously missing date added for reference C2) and initialed copy of the previously submitted IDS is included with this Office Action.

### *Oath/Declaration*

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

Non-initialed and/or non-dated alterations have been made to the oath or declaration (fourth inventor). See 37 CFR 1.52(c).

**Applicant is now required to submit a substitute declaration or oath to correct the deficiencies set forth above.** The substitute oath or declaration must be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability" (PTO-37). Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136. Failure to timely file the substitute declaration (or oath) will result in **ABANDONMENT** of the application. The transmittal letter accompanying the declaration (or oath) should indicate the date of the "Notice of Allowance" (PTOL-85) and the application number in the upper right hand corner.

***103 Rejections Withdrawn***

The rejection of claims 1-31 under 35 USC 103(a), outlined in the previous Office Action, is withdrawn. Upon review of the prosecution history, prior art, and in particular applicant's 37 CFR 1.132 Declarations, the rejection is clearly untenable.

***Allowable Subject Matter***

Claims 1-31 are allowed. The following is an examiner's statement of reasons for allowance:

The key to the instant invention is the aqueous alkali metal hydroxide catalyst.

The closest prior art appears to be US 3,283,014 which teaches the synthesis of acetylenic alcohols from ketones and acetylene using aqueous alkaline hydroxides as catalysts in liquid ammonia (column 1, line 1; Examples 1-10 beginning column 3, line 36). The alkali metal hydroxide catalysts are employed in ratios not higher than 1:10 moles of hydroxide: ketone and preferably 1:30 to 1:200 (column 1, line 55; Example 10, column 6, line 48).

The instant "upper limit" (1:200) falls within the broadest recitation of the prior art "upper limit" (1:10). (Note, however, that these "upper limits" are more than an order of magnitude different (0.005 vs. 0.100, respectively). That is, the prior art "upper limit" merely sets one bound of what is essentially an enormous range of possible ratios.)

The preferred ratio ranges of the prior art fall outside the scope of the range of the instant invention. Working examples 1-9 of the cited prior art do not approach the

instant ratios. Only working example 10 of the cited art teaches a ratio which closely approaches the instant ratio range.

Given the above, the cited prior art may be said to teach away from the instant ratio range and thus away from the instant invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: US 3,082,260 and US 2007/0191649 A1 are cited to show related reactions.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Davis whose telephone number is 571-272-0638. The examiner can normally be reached on M-F 8:30-5:00.
